

## Influenza A Virus Inactivation Examination

#### **Examination Purpose**

The purpose of this examination is to evaluate the virus inactivation effects of the "Paste-type Toothpaste" provided by the examination entrustee. The test subject of this examination is the "Influenza A Virus".

#### 被験物質: 歯磨きペーストタイプ

対象ウイルス	処理時間	ウイルス不活化効率 (単位:%)
A型インフルエンザウイルス (株名:A/WSN/33, H1N1)	5 min.	> 99.98
	30 min.	> 99.91

## **Examination Result**

The substance provided by the examination entrustee "Paste-type Toothpaste" was confirmed to reduce the viral titer of the Influenza A Virus to below the detection limit of this examination under a 5 minute and 30 minute process. \*The Paste-type Toothpaste is BIO PASTE.

# Norovirus (Feline Calicivirus Virus) Inactivation Examination

**Examination Purpose** 

The purpose of this examination is to evaluate the virus inactivation effects of the "Paste-type Toothpaste" provided by the examination entrustee. The test subject of this examination is the "Feline Calicivirus Virus".

\*The Paste-type Toothpaste is BIO PASTE.

対象ウイルス	処理時間	ウイルス不活化効率 (単位:%)
ネコカノシウイルス	5 min.	> 99.98
(株名F9) ※ヒトノロウイルス代替	30 min.	> 99.81

#### **Examination Result**

The substance provided by the examination entrustee "Paste-type Toothpaste" was confirmed to reduce the viral titer of the Feline Calicivirus Virus to below the detection limit of this examination under a 5 minute and 30 minute process \*The Paste-type Toothpaste is BIO PASTE.
